## **Walnut Branch Sanitary Sewer Project to Begin** ***Construction of 18" Line Serves Future Growth***

**SEGUIN, Texas** – Crews will soon be working in the area of the future library but the work isn't related to that project. This project will serve future growth on the northwest side of the city.

The Walnut Branch Sanitary Sewer Project, near 320 West Nolte Street, includes upsizing and realigning sanitary sewer lines. The project will increase sewer flow for anticipated growth on the northwest side of Seguin. Preparation work is scheduled to begin October 20 with excavation, installation and pumping taking place over the next few months. Bypass pumping will be necessary for a period of three or four weeks during the project to alleviate disruption of service to residents. Jordan Foster Construction Company is the contractor for the project.

Letters have been sent to nearby residents alerting them of the project. Questions can be directed to City of Seguin Capital Projects at (830) 401-2776.

Construction of the new library is not anticipated to begin for several more months.

### **About the City of Seguin**

Seguin, Texas is located off Interstate 10, about 35 miles east of San Antonio. Seguin is big enough to boast a top-rated university and a state-of-the-art hospital. More than 25,000 residents enjoy a range of cultural, recreational and employment opportunities. Seguin's robust diversified economy features a steelmaker, a manufacturer of automotive parts and plants making roadside mowing equipment and building materials. In 2009, Seguin was proud to be selected by Caterpillar as the site of a major new engine manufacturing facility.
